FROM: James L. Lissack

SUBJECT: Lehrer Sanitary Landfill Operation, Outagamie County, Town of Buchanan

This writer conducted a field investigation on February 18, 1971, of Lehrer Brothers Sanitary Landfill. The following were noted:

1. Compacting and covering was being conducted.

2. Wood and bark chips were being utilized to create a stable working surface and to sponge up water from thawing snow. This appeared to be working excellently.

3. An attendant was on duty.

4. A large container was placed at the entrance of the site for dumping of garbage from local town residents. This container, when full, is dumped into the landfill. This container is to curtail small traffic from the site.

5. Mr. Lehrer was contacted and indicated no burning is done. No evidence of burning was found.

6. The dumping area to the south of the landfill has been discontinued. All refuse is now being placed in the sanitary landfill portion.

It is the conclusion of this writer that the sanitary landfill operated by Lehrer Brothers is being conducted in conformance with Chapter RD 51.
